

Regolamento Mayan Saga

Gameplay

- Match 3 or more identical symbols, single ticket game.
- The game takes place on a grid of 3x5, 4x5, 5x5.
- Upon purchasing a ticket, 15 new symbols appear from the top of the screen to fill the grid.
- The game gives the player 3 different ways of winning:
 1. Reveal 3 or more matching regular symbols that share a side to automatically remove that cluster of symbols from the board and win according to the prize table. For each symbol removed a new symbol appears from above.
 2. Trigger the Expanding Board feature – Find 2 expanding symbols to expand the starting board from 3x5 to 4x5 and 4x5 to 5x5. Expanding Win will play its flow after all regular cluster wins are removed from the board.
 3. Unlock Extra reveals:
 - > Find 3 Extra reveals symbols to trigger 5 Extra Games.
 - > Extra reveals will be played last in the round (After all wins are removed from the board).
 - > The Extra reveals mode only has high paid symbols - the 4 lowest symbols do not take part in the EXTRA REVEALS.
 - > EXTRA REVEALS will play the same bet as in the triggering round.
 - > EXTRA REVEALS will commence with the same size of grid as the triggering round.
 - > During EXTRA REVEALS mode, the board can only expand, it cannot contract.
 - > If during Extra reveals 2 expanding symbols are found at the same round – the board will expand to the next level: from 3x5 the grid will expand to 4x5 if the grid size is 4x5, when 2 expanding symbols are found the grid will expand to a size of 5x5.
 - > The expanding symbols will not appear anymore once the grid reaches the maximum size.

PERCENTUALE DI RESTITUZIONE (RTP)

Il valore dell'RTP teorico calcolato su base statistica è pari al 96%.
